Test Project (Software Test Engineer)

Code Reference:
[GitHub - prateek3255/TodoApp-with-login: A Todo lists app with social login built on angular js and firebase.](#)

Test Link:
https://todo-list-login.firebaseapp.com/

Instructions:
Use the Test Link to run your Selenium test cases:
1. Login using your github account.
2. create 10 to do list with random strings
3. upon completion log out.
4. Login again with the same account.
5. Delete your list from 5 - 10.
6. Logout upon completion

Candidates will need to send a compiled Selenium working code with instructions on how to check. Please upload it to GitHub and send us the link.
